Innovation is the key element aboard the Navetta 30. The entire project falls under the CE category, Class A, with low fuel consumption and top-tier performance in its category. But technology also means the pleasure of sailing: the Navetta 30 is equipped with stabilizer fins and optional Seakeepers for maximum comfort at anchor. Unmatched sound insulation is achieved through mathematical analysis that measures every noise source, along with the application of floating flooring that reduces sound transmission from the engine room and absorbs footsteps in guest areas.

Large hull windows, decks over 2 meters high, and expansive aft and bow areas: the Navetta 30 embraces the horizon with an open, panoramic view in every direction. The main deck and the lower deck with the VIP cabins become spaces open to emotions, to be enjoyed surrounded by blue. The dining area on the upper deck is a celebration of conviviality, just like the sundeck, which with its extraordinary dimensions opens towards the infinite.

The wide-body configuration of the Navetta 30 features 3 decks, a significant challenge overcome for a yacht in this segment. It is a masterpiece of naval art that projects the soul toward the sea: the exterior spaces on board expand to embrace moments of socializing, relaxation, and contemplation.
